

A Presentation for the Community
*Student Pathways through Courses Aligned to
the CCSSM and New Math Assessments*

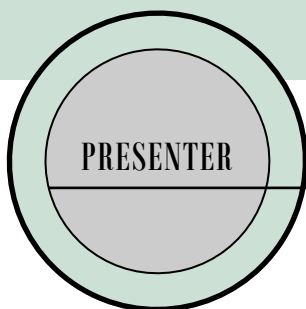

Wednesday, September 18 at 7pm
Redwood Middle School Multipurpose Room

Learn about the Common Core Math Pathways

Learn about the new Common Core State Standards in Mathematics (CCSSM) from David Foster, Executive Direction of the Silicon Valley Math Initiative and consultant to the new state assessments.

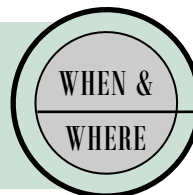

Districts are discussing and determining the middle school and high school course offerings aligned with the new CCSSM standards and assessments. This session will frame the issues around these decisions as well as explore the challenges such as accelerating students, its impact on the middle school course sequence, implementation and professional development implications, credentialing, and insuring college readiness and equity.

Information about the new assessment, the SMARTER Balanced Assessment Consortium will be presented.

David Foster

David Foster is the founder and executive director of the Silicon Valley Mathematics Initiative (SVMI) comprised of over 100 member districts and school networks across America. SVMI is affiliated with programs at University of California, Berkeley, Stanford University and San Jose State University. David is the primary author of Interactive Mathematics and Co-director of the Santa Clara Valley Math Project.
